

The **Gastite** system is a safe, time-saving and efficient method of installing piping for natural gas and propane gas. It utilizes corrugated, semi-rigid stainless steel tubing (CSST) with polyethylene jacketing and fully integrated, all-metal components. Featured products include The Flash Shield, Flexsure Solar, plus a whole lot more. Contact your salesman with all your product and training needs .

Gastite Flash Shield Pipe and Fittings 3/4” thru 1”

Features & Benefits

- Flexible and durable allows for simple routing through complex building structures and designs.
- Pre-marked by the foot for easy measuring and installation
- Minimum tubing wall thickness of .010 on all sizes is more robust than other brands of CCST.
- Annealed 304 stainless steel makes tubing more flexible than brands not heat-treated.

Underground Yellow Pipe and Fittings 3/4” thru 1-1/2”

Features & Benefits

- Assembles in minutes with Continental Industries Con-Stab I.D. Seal stab-on fittings
- Designed tested and certified for direct burial.
- Eliminates corrosive threats associated with metallic piping

Gastite Certification Requirements:

The installation of Gastite and FlashShield Flexible Gas Piping Systems must be performed by a qualified installer who has successfully completed the Gastite/FlashShield training program. Contractors interested in receiving Gastite/FlashShield certification should visit www.bjterroni.com for class schedules.
