

THEY'RE JUST YOUR SPEED??

Taco "1600" Series In-Line Pumps combine the ultimate in reliability with ease of installation & maintenance, for heating, air conditioning, pressure boosting, cool water transfer and water supply applications. Quiet, dependable & proven performance makes the "1600" Series Pump the right choice.

Taco 1900 Series In-Line pumps are compact, energy efficient and can be installed anywhere in the piping layout. The 1900 is designed to be self supported by the system piping (requiring no additional "strapping" or external support) and can be mounted horizontally or vertically. Permanently sealed grease lubricated ball bearings in the motor make the 1900 Series pump virtually maintenance free.

Taco KV Vertical In-Line Pumps are designed for optimum performance and ease of installation. The close-coupled design results in improved alignment and increased seal life. They require no isolation pads and their simplified, in-line design save you time and money.

Taco's TA Series Pumps feature heavy-duty, long lasting quality for a variety of water circulation applications. Proven performance and longevity, balanced double-entry impeller design, and modular components are just a few of the TA Pumps' attributes.

FI Series Pumps provide the ultimate in reliability and ease of installation for heating, air conditioning, pressure boosting, cooling water transfer, and water supply applications.
